

How to connect your CCPS iPad to your home Wi-Fi

Follow the directions below to connect your student iPad to a wireless network. The step number corresponds to the number in the image. *Please note that this does not need to be done in a CCPS building as the iPad will connect automatically to the CCPS network. If you are having issues connecting to the CCS-Secure-Intranet at school, [see this article](#).

1. From the iPad home screen, find and click on the Settings icon.

2. Find Wi-Fi on the left-hand side. It should read "Not Connected" if you are not connected to the internet. Click to open the Wi-Fi settings.

3. In the Wi-Fi settings, find the wireless network you wish to connect to and click it.

4. A window will open. Type the password for the wireless network.

5. Click Join.

6. You should now be connected to the wireless network. A check should appear next to the network's name.
